ARCHITECTURAL FITTINGS

Stature
Panel Fittings

Fittings for mounting offset, point fixed, frame-less panels to a structural support.

STATURE hardware fittings are designed as a fully mechanical installation solution for attaching frameless glass or acrylic panels to a structural support, eliminating the need for any on-site welded components.

Stature fittings are available for a variety of mounting conditions including double panel attachment as well as end conditions.

Please refer to individual specification pages for detailed information on each hardware fitting.

ARCHITECTURAL FITTINGS

STATURE - SYSTEM FITTINGS

STATURE hardware fittings are available as standard configurations shown below.

More detailed information on each hardware fitting configuration is available on individual specification pages on our website:

ARCHITECTURAL FITTINGS

Architectural Fittings produces high quality exposed architectural hardware fittings for commercial and residential applications.

Our products are made of high grade machined aluminum and stainless steel and are finished to high specification standards.

Architectural Fittings product lines are based on a systems approach with unique components that can be configured in a variety of combinations. This design approach allows for our products to provide a cohesive aesthetic to any building condition requiring an exposed connecting system.
